FITTINGS AND SYSTEMS**

FOR A SAFER, SMARTER LIVING EXPERIENCE.

Safety Strengths

Godrej provides a total locking solution, offering locks at various safety strengths to ensure optimum safety.

- **Safety Strengths 1 - Basic Safety**
- **Safety Strengths 2 - Ultra Safe Technology**
- **Safety Strengths 3 - Extra Safe Technology (EXS)**
- **Safety Strengths 4 - EVVA 3 Kurve System Technology (3KS)**
- **Safety Strengths 5 - Advanced Digital Access Control Technology**

Godrej Safety Strength 1 locks come with the conventional mechanical locking system through basic security systems which have levers, wafers, tumblers and single-row pin-cylinder technologies.

Godrej Safety Strength 2 locks have highly precise computerised dimple keys with Advanced multi-row pin-cylinder technology. Here, the maximum number of combinations (key differs) that can be provided is up to 100 million, which makes each key unique and non-interchangeable with any other key.

Godrej Safety Strength 3 locks come with Advanced, Angular multi-row pin-cylinder technology. The maximum number of combinations (key differs) that can be provided is up to 2 billion and a highly complex system of master key solutions is possible.

The highest safety strength, Godrej EVVA, in mechanical locks, comes with a revolutionary EVVA 3 Kurve system technology (3KS) with a floating pin, sidebars and locking bar. This conforms to European standard EN 1303. The 30 trillion combination cycle means that a single key will not repeated for the next 30 trillion keys. Since there are not 30 trillion humans on the planet, it's virtually impossible for someone else to have an identical key as yours.

Unlike conventional mechanical locks, the Godrej Digital Locks are based on virtual networks, which have four different access control systems and have unlimited combinations to ensure enhanced safety.
